F O R E W O R D

This report summarizes classification counts of Montana and out of State vehicles that were taken on the Primary Highway System at each County Line during the summer of 1959.

Montana vehicles were classified by County of registration so that the amount of travel between Counties could be determined. All vehicles, including out of state registrations, have been adjusted to an average daily traffic volume for 1958. All Classification counts were taken during the seven hour period of 8 A.M. to 3 P.M.

The classification data have been arranged by Federal Aid route numbers as shown by the map on the following page. Montana County registration numbers are shown on page iii.
